Appendix A

Guidelines for Developing A Mission Statement and Bylaws

Prepared by Mary McGhee
www.casagordita.com/bylaws.htm

Mission Statement
What’s the purpose of a mission statement?
A mission statement sums up your organization's reason for being. It explains your intentions, priorities, and values to people both inside and outside the group. It can guide you and help you stay focused on the things that are most important to you. If you ever question whether to take on a project or choose a particular course of action, you can look back on your mission statement and see if the proposal is consistent with it.

How do we create a mission statement?
Start by brainstorming among the members of your group. What are they there for? What do they want to see the group accomplish? What do they want to get out of the group for themselves? What values, standards and goals do they never want to lose sight of?

Write down everything people suggest at first, without debating the ideas. When you’ve run out of new thoughts, see if you can find some that are similar or have common themes. Try to come up with statements summarizing these concepts. Let people discuss and make adjustments until everyone can agree with, or at least not object to, what you’ve written.

Have someone put together a draft based on what you’ve agreed on, and bring it back to the group for final adjustments and approval.

Then what do we do with it?
Your mission statement should be communicated to new members of your group, and to anyone who wants to know what you’re all about. You may want to publish it in a brochure, or put it on a web site, or otherwise make it available for people to read. It’s a good idea for all members to look back at it occasionally, to remind yourselves of what you’re doing there.

Your mission statement doesn’t need to be set in stone. In time, your group’s experiences, or the input of new members, may cause you to want to revise it. Changing your mission statement should be done with careful consideration, making sure that all your members can have their say about it, and finalized using the group’s usual method of making important decisions.

Bylaws
What should we include in our bylaws?
You should consider including the following in your bylaws, if they apply to your group:
✦ name of the group
✦ dues — what people pay, when and how they pay it
✦ meetings
✦ when and how often you meet
✦ definition of a quorum (the number of members who must be there to do official business and make decisions — usually at least half)
✦ who facilitates the meeting, and who takes minutes
whether you will use Roberts Rules of Order (a.k.a. parliamentary procedure), or some other procedures for conducting business

- anything else you want to do at every meeting (i.e. saluting the flag, reading the Twelve Steps, singing the Monty Python Lumberjack Song, etc.)
- how decisions are made — will you decide by consensus, some form of modified consensus, or majority vote?

- membership
  - who can be members, what they have to do to qualify, and what they need to do to maintain membership
  - how and for what cause a member can be removed from the organization
  - any requirements and restrictions on the participation of nonmembers at meetings or group activities

- organizational structure — officers, committees, etc.
  - officers’ titles and responsibilities
  - committees — what they do, who is on them
  - how and when officers, coordinators, committee chairs, and/or committee members are selected, and how and for what cause an officer, coordinator, committee chair, and/or committee member can be removed from their position
  - how vacant positions are filled

- how the group’s finances will be handled
  - who keeps the group’s funds
  - how that person is to report to the group about money that comes in and goes out
  - how expenditures are approved by the group

- how the bylaws, mission statement, and other important documents can be changed

We’re all friends here. We’re responsible people, and we trust each other. We’re never going to disagree over whether a decision was made fairly, and we won’t need to relieve someone of their duties, or kick someone out of the group. Why do we need to include all that unpleasant stuff in our bylaws?

Honorable people with the best of intentions can still disagree. Further, your group may not always have the same members. You know the people you’re working with now, but what about those who might join later on?

   If people understand and agree on the groundrules beforehand, they are more likely to feel they were treated fairly and had a chance to be heard, even if a decision the group makes isn’t the one they would have chosen. People will feel safer if they know they have recourse in case they ever do feel something was unfairly or improperly done.

   Contingency plans for dealing with problems in the group — a member who isn’t following through with his/her responsibilities, or is behaving counter to the group’s best interests, values, or ethical standards — work much better if they’re made in advance, in the abstract, before specific people and situations are involved. If you wait until that point to decide how to handle a problem, it becomes personalized and more open to charges of unfair bias.

   If you’re all reasonable, trustworthy people who are willing to put the best interests of the group ahead of your personal agendas, then you may very possibly never need to use these provisions of your bylaws. But people who trust and respect each other so much should be able to make plans for handling conflict that everyone believes are fair and reasonable and something they can live with.

Adapted from Antleader Guidelines #C4: Constitution and Bylaws, published by the Student Activities Office at the University of California, Irvine, who in turn took it from the Student Organization Resource Manual, published by the University of Iowa.
Examples of Mission Statements

The mission of the Historic Columbia Foundation is to nurture, support and protect the historical and cultural heritage of Columbia and its environs through programs of advocacy, education and preservation.

Columbia, South Carolina 29223
803-896-6178
http://www.state.sc.us/scdah/histrcpl.htm
The State Historic Preservation Office does not encourage moving historic buildings because moving a building always diminishes its historic value. According to the National Park Service,

...the significance of buildings, structures, and objects is embodied in their locations and settings as well as in the structures themselves. Moving a property destroys the relationships between the property and its surroundings. A move may also involve some unavoidable loss of historic features such as landscaping, foundations, and chimneys, as well as loss of the potential for associated archaeological deposits.

In addition, the community from where a building is moved loses an important part of its history.

Sometimes, however, the only way to save a building from demolition is to move it. Moving a historic building should be a last resort. Before considering a move, make sure that all other preservation options have been exhausted. If you decide that a building must be moved in order to save it, the State Historic Preservation Office recommends:

- Reading *Moving Historic Buildings* by John Obed Curtis.* Moving historic buildings requires considerable expertise. This booklet will alert you to precautions to take and help you plan a relocation process that will cause the least damage to the character and historic fabric of the building.
- Hiring an architect or contractor with historic preservation expertise and experience to plan the move and to protect and restore the building on its new site. We can provide a list of historic architects, although it is not comprehensive.
- Developing a budget for moving and restoring the building on a new site. It is important to make sure you have the funds for the move, restoration, and a plan for maintenance before beginning the move.
- Documenting the building on its original site to help with its restoration on the new site and to make a permanent record of its history. This should include historical research, oral histories, photography, and site mapping.
- Selecting a setting for the building that is as similar as possible to the original location. The setting should be similar in topography, vegetation, density, and other characteristics. For example, a farmhouse should be placed in a rural setting, and a house originally constructed in a town belongs in a more urban setting.
- Hiring a moving contractor with knowledge and sensitivity about moving historic buildings. It is important to select a procedure that will cause as little damage as possible to the historic fabric of the building.
Locating the building on the new site with the same orientation it had on the old site and re-establish features of the setting or landscape found at the original site such as shrubs, fields, and fences. The setting of a building is usually closely associated with its history and architecture.

Creating Collections of Moved Buildings

The State Historic Preservation Office, the National Park Service, and most historic preservation professionals do not recommend creating collections of moved buildings. Artificial groupings of historic buildings create complexes that never existed in history. They convey a false sense of the historic development of the area in which they are located. Sometimes they can be mistaken for historic districts and can be confusing to visitors, especially children.

If, however, you decide to create a collection of moved historic buildings, we recommend:

♦ Selecting only buildings that are in imminent danger of destruction, not buildings that are deteriorated but may have some hope of being saved on their original sites in the future.

♦ Developing a detailed master plan prior to moving the buildings. The plan should include the overall philosophy of the project, organization of the buildings on the new site, and interpretation for the complex. The plan should ensure that adequate time is allowed; adequate funding is available for moving, restoring, maintaining, and interpreting the buildings; and qualified professional personnel are involved in the planning and implementation.

♦ Developing plans — consistent with the recommendations in Moving Historic Buildings — for documenting the buildings on their original sites, selecting new sites, moving the buildings, and restoring them.

♦ Planning the interpretation of the complex carefully to ensure that visitors are not given a false sense of history. Make it clear that the buildings were moved to the site.

♦ Avoiding moving the buildings to a site that has historical or archaeological significance in its own right that will be damaged or diminished by the intrusion of the buildings.

Revised August 2007
Preservation Hotline #8: Tracing the History of Your Historic Building

The first step in historic preservation is almost always documentation; that is, tracing the history of the building or other historic resource of interest. Whether your goal is to pursue a nomination to the National Register of Historic Places, to document a historical marker at the site, or simply to satisfy your curiosity about something important to the history of your community, you might need a few tips on where to begin your research and on what types of sources are available. Though these tips focus on buildings rather than other types of historic resources, many of them are applicable to all types.

The Building: Start with the building itself. Examine it carefully, both inside and out. Take precise notes on its current appearance: the building materials, style, and shape, as well as the number and style of windows and chimneys and the appearance and material of the roof. All of these features may be clues to the date of construction.

The Occupants: Another preliminary source of information is the people that have lived, worked, gone to school, or worshipped in or around the building. Talk to the owners or occupants, both current and former, and ask them questions. Who built it? Why? Who was the architect or builder? Have there been any alterations? When and why did they occur? Ask to see and make copies of any old photographs, papers, etc. that will assist you in determining the history of the building.

The Documents: Many types of documents can help you trace the history of a building — from deeds and tax records in the county courthouse to printed maps and published city directories in libraries or archives. Begin with those outlined below.

County courthouse records can provide you with a chain of title that will establish the history of the ownership of the property. You will need the name of the current owner and the current address to begin your search at the courthouse. Don't be afraid to ask for help; records storage will vary from county to county and will be found in different offices. For very old properties, you may end up in the county or state archives. Other types of documents that you may be able to locate at the courthouse or in county records include wills and probate records; these can also be of assistance if you have a break in the chain of title. Building permits did not exist until the late nineteenth century, but if you are researching a twentieth century property, these can be valuable. Most importantly, take good notes. Knowing where you got a piece of information, down to the book and page number, will come in handy later. The South Carolina Department of Archives and History in Columbia also has a collection of wills,
deeds, property inventories, and similar records for many South Carolina counties.

**Maps** can be particularly useful when researching historic buildings. From the 1870s to about 1950, the Sanborn Fire Insurance Company periodically issued maps detailing the buildings in cities and towns. These color-coded maps show street names and addresses and provide information about the size of a building, its construction materials, the number of outbuildings, and even details about plumbing and electrical systems. Start with the most recent map for your area and work backward; if your building is on one map, but not on the map previously issued, there is a strong possibility it was built in the years between the publication of those two maps. These maps are available at the South Caroliniana Library at the University of South Carolina in Columbia or online at [www.sc.edu/library/digital/collections/sanborn.html](http://www.sc.edu/library/digital/collections/sanborn.html).

**City directories** list the names, addresses, and occupations of adult residents of a city or town, and usually list businesses and addresses as well. Directories usually are organized both alphabetically by last name as well as addresses by street, so the history of a property can be traced through its address, not just through its owner. Note that addresses can change over time, so 123 Main Street may not be at the same location as it was 75 years ago. City directories can often be found in county libraries, historical societies, or the South Carolina State Library or the South Caroliniana Library in Columbia.

**Published town or county histories**, though of widely varying quality, often provide valuable information on the development of a city, town, or county. The typical county history will rarely address a particular building unless it was significant to the community as a whole, such as a courthouse, railroad depot, church, or school. Such histories can often be found in county libraries.

**The United States Census**, available for every year ending in “0” from 1790 to 1930 (except 1890), provides information about individual households, including the head and size of the household and also (beginning in 1850) information about every individual living in a household, including his or her birthplace, occupation, education, and amount of property owned. Slave schedules for 1850 and 1860 provide information on the numbers of slaves an individual owned. Agricultural and industrial schedules for 1850, 1860, 1870, and 1880 list the types of crops, livestock, and products produced on a farm or plantation and the numbers of employees and types of products manufactured by a business. The South Carolina census records are available on microfilm at the South Carolina Department of Archives and History. They can be found online through [www.ancestry.com](http://www.ancestry.com).

**Newspapers** can provide rewarding information if you have the time and patience to review them. They usually are not indexed, however, and you may spend a great deal of time reading the newspaper for little to no information directly related to your search. They are most useful if you can identify a very small period of time to research or a specific date, such as the deathdate of an individual, whose obituary may be a valuable source. They provide information related to the owner or
occupant of a building, the construction and opening of public buildings, churches, or businesses, or major events, such as floods, fires, hurricanes, or other local disasters that might have changed the built environment. Newspapers are usually available in county or university libraries, and local archives or historical societies, often on microfilm. The South Caroliniana Library also has a large newspaper collection.

- **Architectural plans**, like building permits, are probably not available unless you are working with a relatively recent and sophisticated building. But if they do exist, they can be a marvelous resource, showing detailed floor plans, and measurements and placement of windows and doors.

- **The State Historic Preservation Office (SHPO) at the South Carolina Department of Archives and History in Columbia** also maintains files on historic properties in the state, from surveys, or preliminary studies of resources in a particular town, city, or county, to nomination files documenting historic buildings, sites, districts, structures, or objects listed in the National Register of Historic Places, the official Federal list of historic and cultural properties significant in American history, architecture, archaeology, engineering, and culture. The South Carolina Statewide Survey of Historic Properties has documented over 60,000 historic resources over 50 years old, while there are more than 1300 listings in the National Register, including more than 160 historic districts, or collections of historic buildings. Survey and National Register files at the SHPO may contain architectural descriptions of a particular historic property, a statement of its significance, and a photograph or photographs documenting the resource at the time it was designated. An index to survey records is available at [www.state.sc.us/scdah/hpsurvy/countylist.htm](http://www.state.sc.us/scdah/hpsurvy/countylist.htm). National Register records are available online at [www.state.sc.us/scdah/hphistpropinfo.htm](http://www.state.sc.us/scdah/hphistpropinfo.htm).

- **Additional sources** may also be available for the building you are researching. The information you have discovered from the sources listed above will guide more detailed research using family or personal papers, family histories, wills or probate records, historic photographs, church histories, business records, or tax information.

**For More Information**

The National Register of Historic Places

The National Register of Historic Places is the nation’s official list of historic places worthy of preservation. Over 1,300 historic places in South Carolina — some individual properties, some entire districts — have been listed in the Register. They range from Indian campgrounds dating to 10,000 B.C. to buildings associated with the Civil Rights movement of the 1960s, from grand mansions to modest farmhouses, and from upcountry textile mill villages to Pee Dee railroad towns to lowcountry rice fields. These places link us tangibly to our past and contribute to our understanding of the history of our communities, our state, and our nation.

The National Park Service, under the Secretary of the Interior, maintains the National Register of Historic Places. In each of the states and territories a State Historic Preservation Office (SHPO) coordinates the nomination of properties to the National Register before the applications are submitted to the National Park Service. In South Carolina, the SHPO is a program of the Department of Archives and History.

What properties are eligible for listing in the National Register?
Buildings, structures, sites, objects, and districts can be listed in the Register. Generally they must be at least fifty years old, but all properties that are fifty years old are not eligible for listing. The property must also possess significance in American history, architecture, archaeology, engineering, or culture and retain its historic integrity. This means that the property must not have lost the physical qualities that convey its significance. The National Register Criteria for Evaluation are listed at the end of this brochure.

How does the National Register program encourage the preservation of historic properties?

National Recognition
National Register listing honors a property by recognizing its importance to its community, the state, or the nation. This recognition increases local awareness of the value of historic properties and can validate and spur preservation efforts. In South Carolina, owners of properties listed in the National Register can purchase and display National Register plaques.

Financial Incentives
There are some financial incentives for preserving National Register properties. These include:

✦ 20% Federal Historic Rehabilitation Tax Credit: Owners and some lessees of income-producing buildings listed in the National Register may be eligible for a federal income tax credit equal to 20% of their rehabilitation expenses under the Tax Reform Act of 1986.

✦ 10% State Historic Rehabilitation Tax Credit: In South Carolina, taxpayers
who qualify for the 20% federal income tax credit may also qualify for a state income tax credit of 10% of their rehabilitation costs under the South Carolina Rehabilitation Incentives Act.

♣ Easement Donations: The federal Internal Revenue Code also provides for federal income, estate, and gift tax deductions for charitable contributions of partial interests in a historic structure that is listed in the National Register or a “historically important land area.”

♣ 25% State Historic Rehabilitation Tax Credit: Under the South Carolina Historic Rehabilitation Incentives Act, owners who rehabilitate their historic residences that are listed in or individually eligible for the National Register may be eligible to subtract 25% of the costs of many expensive repairs and renovations from their state income taxes.

♣ Historic Preservation Grants: Organizations, institutions, and government entities that own National Register properties may be eligible for grants for preservation planning projects. If the property is within the jurisdiction of a Certified Local Government, these groups may also be eligible for grants for stabilization and weatherproofing. Certified Local Governments are designated by the National Park Service.

Protection
Federal and state laws encourage, but do not mandate, the preservation of National Register properties. National Register listing results in the following limited protection:

♣ Consideration in planning for federal, federally licensed, and federally assisted projects: Section 106 of the National Historic Preservation Act of 1966 requires federal agencies to consider the effect of their actions on properties listed in or eligible for listing in the National Register. Federal agencies must consult with the State Historic Preservation Officer or Tribal Historic Preservation Officer (on Catawba tribal lands) when planning projects that involve federal funds, permits, licenses, or property.

♣ Consideration in planning for certain state-assisted projects: State laws and regulations require the South Carolina Department of Health and Environmental Control (DHEC) to consider the effect of proposed projects on historic properties when deciding whether or not to approve mining permits or Ocean and Coastal Resource Management (OCRM) permits and certifications (in the eight coastal counties). For projects requiring OCRM approval or mining permits, the SHPO helps DHEC evaluate the effect of proposed projects on historic properties that are listed in or eligible for the National Register. State law also establishes a review process for projects involving National Register-listed properties owned or leased by the State of South Carolina. The SHPO works with state agencies to incorporate historic preservation concerns with their needs.

In some communities, local ordinances provide protection for historic properties, but these ordinances are established by local governments; they are not part of the National Register program. South Carolina local governments can designate historic properties and protect them with ordinances whether or not they are listed in the National Register.
Will National Register listing place restrictions on my property?
Owners of private property listed in the National Register have no obligation to open their properties to the public, to restore them, or even to maintain them. Owners can do anything they want to their properties, provided there is no federal involvement (funds, licenses, or permits) and they do not need a state mining permit or a permit or certification from the Office of Ocean and Coastal Resource Management (OCRM), South Carolina Department of Health and Environmental Control (DHEC).

What is the procedure for listing a property in the National Register?
Anyone can prepare a nomination to the National Register. All nominations undergo scrutiny in a process that begins with a preliminary review by the SHPO. SHPO staff provide technical assistance to individuals, organizations, and consultants who prepare nominations. Completed and technically correct nominations are presented to a State Board of Review, which meets at least twice each year. The Board of Review is composed of professionals with expertise in history, architectural history, archaeology, architecture, and other preservation-related fields, and interested citizens. Nominations approved by the Board of Review are submitted to the National Park Service, which makes the final decision concerning whether a property will be listed.

Where can I get more information?
Visit the SHPO website at www.state.sc.us/scdah/histrcpl.htm. The National Park Service website at www.cr.nps.gov/nr/ also includes much information about the National Register program.

♦ Contact Andrew Chandler (803-896-6179 or chandler@scdah.state.sc.us) or Tracy Power (803-896-6182 or power@scdah.state.sc.us).

National Register Criteria
The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, association, and:
A. are associated with events that have made a significant contribution to the broad patterns of our history; or
B. are associated with the lives of significant persons in our past; or
C. embody the distinctive characteristics of a type, period, or method of construction; represent the work of a master; possess high artistic values; or represent a significant and distinguishable entity whose components may lack individual distinction; or
D. have yielded, or may be likely to yield, information important in prehistory or history.

Exceptions to Criteria
Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past fifty years are considered ineligible for the National Register. However, such properties will qualify if they are integral parts of districts that do meet the criteria, or if they can be categorized as:
A. a religious property that derives its primary significance from architectural or artistic distinction or historical importance; or

B. a building or structure that has been removed from its original location but is significant primarily for its architectural value or because it is the surviving structure most importantly associated with a historic person or event; or

C. a birthplace or grave of a historical figure of outstanding importance when there is no other site or building directly associated with the individual's productive life; or

D. a cemetery that derives its primary significance either from the graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or

E. a reconstructed building that is accurately executed, is located in a suitable environment, is presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same associations has survived; or

F. a property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance; or

G. a property achieving significance within the last fifty years if it is of exceptional importance.
Nominations to the National Register of Historic Places can be pursued either by the owner of a property or by anyone else who is an interested party. All nominations undergo scrutiny in a process that begins with a preliminary review by the State Historic Preservation Office (SHPO), continues with a review by the South Carolina State Board of Review, and ends with a review by the National Register Office of the National Park Service. For those of you interested in the nominating process, the procedures are outlined below.

1. As a first step, you should request a Preliminary Information Form (PIF) by calling 803-896-6178, or you can print a PIF from our website at www.state.sc.us/scdah/PIFFORM.htm. You should complete the PIF and return it to SCDAH, 8301 Parklane Road, Columbia, SC 29223-4905 along with the required historical documentation, photographs, and maps.

2. The process will begin when the SHPO reviews the information and makes a recommendation on the property’s potential for listing in the National Register. This preliminary review is not binding. It merely facilitates requests and discourages the investment of time and money in properties that fall short of the federal criteria.

3. Following the preliminary review, the SHPO will notify you of its recommendation. If the recommendation is negative, the SHPO will discourage you from continuing the process. If the recommendation is positive, the SHPO will encourage you to pursue a formal National Register nomination. You can prepare the nomination yourself, or you can hire a professional historic preservation consultant to do it for you. Because the SHPO has limited time and staff, it is not able to prepare nominations.

4. If you are preparing a nomination for the Review Board, the SHPO’s National Register staff will give you instructions, forms, and guidance. To ensure that your nomination meets the strict standards required by the National Park Service, you should submit a draft to the National Register office at least fifteen weeks before the review date. The staff will examine it and return it to you with suggested revisions. You must revise your draft and return your nomination in final form to the National Register office at least five weeks before the Review Board meeting. The Review Board is made up of historians, architectural historians, architects, archaeologists, and other citizens interested in historic preservation. It holds public meetings two or three times a year.

5. The SHPO will send you an official notification of intent if you are the owner of a property that South Carolina’s State Board of Review will be considering for nomination. As the owner, you will have the opportunity to comment on the proposed action, either by supporting the nomination or by submitting an objection to the SHPO. If you wish to object, you must do so in a notarized letter that certifies both your ownership of the property and your objection to the nomination.
6. National Register nominations are presented to the Review Board at its public meetings. Nominations that the Board approves are revised by the SHPO staff, if necessary, then signed by the Deputy State Historic Preservation Officer and forwarded to the National Park Service in Washington. The National Register Office of the Park Service reviews the nominations and has 45 days to approve or reject them for listing in the National Register or to return nominations that are technically or professionally inadequate to the SHPO for correction and resubmission.

7. When the National Park Service approves a nomination, the nominated property is usually listed in the National Register. If the private property owner (or a majority of private property owners if the property is a historic district), has objected to the nomination, the property will be approved for listing but not entered in the National Register. The Park Service will notify the SHPO of its action on the nomination, and the SHPO will then relay the information to you. You will be issued a certificate and may, as an owner or other interested party, purchase a bronze plaque designating the nominated property as a National Register listing.
The South Carolina Historical Marker Program

The South Carolina Historical Marker Program, originally the South Carolina Highway Historical Marker Program, was authorized by an act of the South Carolina General Assembly in 1905 creating the Historical Commission of South Carolina with authority “to have direction and control of the marking of historic sites, or houses, or localities.” The program was officially established in 1936 when a marker was erected near the site of the Long Cane Massacre near Troy, in McCormick County. More than 1,000 markers have been erected by the program since that time. Since 1954 the South Carolina Department of Archives and History, as the successor state agency to the Historical Commission of South Carolina, has been responsible for the program as part of the Historical Services Division. The enabling legislation creating the Department of Archives and History gave it the responsibility for “the approval of the inscriptions for all historical markers or other monuments erected on state highways or other state property.”

South Carolina Historical Markers mark and interpret places important to an understanding of South Carolina’s past, either as the sites of significant events or as historic properties like buildings, sites, structures, or other resources significant for their design or association with institutions or individuals significant in local, state, or national history. Historic properties individually listed in the National Register of Historic Places are ordinarily eligible for historical markers, as that listing guarantees that a case has already been made for their significance. However, many other places not eligible or not yet nominated for listing in the National Register are also eligible for historical markers. National or statewide significance is not a prerequisite, and many properties of primarily local significance have already been marked.

In the past, markers were placed along the nearest South Carolina state highway and contained references to the location of the place being marked, usually some distance away. More recently, markers have been erected as close to the historic site as possible, either on state highways and on other public streets or roads.

Without state funding, the Historical Marker program has always depended on the citizens of South Carolina to suggest, document, sponsor and pay for its historical markers, and to maintain them once erected. Markers may be sponsored by historical, patriotic, civic, or other organizations, or by institutions such as church congregations or schools and colleges. Though individuals may not sponsor markers, they may propose and pay for them provided the marker is sponsored by an appropriate local organization or institution.

Program Guidelines

South Carolina Historical Markers are intended to mark historic places and are not primarily memorials to individuals or institutions associated with those places.

Historic properties less than twenty-five years old, associated with events that occurred less than twenty-five years ago, or significant for their association with significant persons who died less than twenty-five years ago will not ordinarily be eligible for historical markers. Any exceptions will only be made on a case-by-case basis after review by the Archives and History Commission.

The sites of significant buildings no longer standing may be eligible for historical markers under the same criteria as other historic properties.

Historic properties or sites closely associated with significant persons may be
marked primarily for that association only if:
a) the property is the property or site in the
state which best represents the individual’s
community of birth or residence,
productive career, association with a
particular institution, or association with a
significant event, and
b) no other site in South Carolina closely
associated with the individual and marked
primarily for that association has already
been marked.

Sites of significant events should be
marked, when possible, on the nearest public
street, county road, or state highway.

Counties, cities, or towns may erect
markers based on their establishment or date
of incorporation.

Cemeteries may be eligible for a single
marker based on their significance to a
particular community, significant persons
buried there, their association with significant
events, or their significance in gravestone art
or cemetery design, but individual gravestones,
gravesites, or plots within cemeteries will not
be eligible for historical markers.

Individual components of a historic
property already marked as an entity will not
be eligible for historical markers.

**Marker Specifications & Prices**

South Carolina Historical Markers are
made of cast aluminum. The earliest markers,
cast from 1936 to 1954, have a circular device
at the top center bearing a palmetto tree and
“SC”. They are gray with raised gray letters or
silver with raised black letters. Markers cast
since 1954 have a triangular device at the top
center bearing the state flag; those cast from
1954 to 1990 are dark blue with raised silver
letters, and those cast since 1990 are silver
with raised black letters.

City Size Markers, erected in incorporated
cities and towns, measure 24” x 36”, with one
title line (1.5” letters, 17 characters per line)
and 18 lines of text (1” letters, 27 characters
per line). These markers are available with
either a standard 7’ post or a 10’ post if
required by local governments.

Country Size Markers, erected at all other
sites, measure 42” x 32”, with one title line (2”
letters, 25 characters per line) and 11 lines of
text (1.5” letters, 36 characters per line). These
markers are available with a standard 7’ post.

**PRICES AS OF JULY 1, 2006**

<table>

<td>$1475.00</td>
<td>$1625.00</td>
</tr>
<tr>
<td>COUNTRY</td>
<td>$1575.00</td>
<td>$1725.00</td>
</tr>
</tbody>
</table>

*Do not send checks to the South Carolina Department of Archives & History.*

When the final marker text is approved by
the director the applicant will send payment
to:  Sewah Studios
     P.O. Box 298
     Marietta, Ohio 45750
     888-557-3924
     sewah@sprynet.com

**Location of Markers**

Markers are usually placed in the right-of-way
of state highways or public roads. The precise
location of the marker must be approved
by the South Carolina Department of
Transportation in the case of markers erected
on state highways and the chief elected official
of a particular county, city or town in the case
of markers erected on county or other public
roads; when markers are erected on private
property the property owner must approve
their location. Permissions should be obtained
early in the approval process. The Department
of Transportation will often erect or assist
in erecting markers, and applicants should
contact:

Assistant Director of Maintenance
South Carolina Department of
Transportation
P.O. Drawer 191
Columbia, S.C. 29202
**Marker Texts**

Markers may either have the same text on both sides or different text on each side, depending upon the significance of the property being marked and the space required to properly interpret its history. Most markers for properties of national or statewide significance will require two sides of text, and while most markers for properties of primarily local significance will have the same text on both sides, those properties may also require two sides of text. Sponsors may wish to prepare draft texts for both types before making that decision.

Applicants will submit a draft text for the proposed marker, which will be reviewed and revised as necessary by the coordinator of the South Carolina Historical Marker Program for content, style, and space. This second draft text will be sent back to the applicants for their review and approval, and then revised as necessary. The final marker text will then be approved by the director of the South Carolina Department of Archives and History, and copies will be sent to the applicant, the Department of Transportation, and Sewah Studios. The approval process generally takes from three to six months; marker applications are reviewed, revised, and approved in the order in which they are received.

Draft preliminary marker texts should be accompanied by documentation of the history and significance of the property being proposed for a historical marker. Footnotes or endnotes are not required, but copies of relevant portions of major primary and secondary sources used (including family papers; county and state government records; church, school, or cemetery records; newspaper, magazine, or journal articles; and county, city, or town histories, church histories, biographical sketches, or other pertinent sources) should be included.

The coordinator of the South Carolina Historical Marker Program will advise applicants on the procedures for ordering historical markers once the final text is approved. It usually takes Sewah Studios, the foundry which casts historical markers for South Carolina and many other states, six to twelve weeks to cast and ship a particular marker once payment is received. The entire approval process may take up to a year from first application to shipment of the completed marker.

**Marker Dedication Ceremonies**

Many historical markers, though not all of them, are dedicated or unveiled with ceremonies that range from the simple to the elaborate. The coordinator of the South Carolina Historical Marker Program can help you plan a ceremony and representatives from the South Carolina Department of Archives and History can usually attend.

**Maintenance & Replacement**

There are no state funds for maintenance or replacement of historical markers; sponsoring organizations are responsible for any maintenance necessary, most often no more than a simple cleaning or repainting, or for replacing destroyed or badly-damaged markers. Our brochure “Cleaning, Repairing, and Repainting Historical Markers” contains more detailed information on the maintenance of markers.

Great Branch Community Center
2890 Neeses Highway
Orangeburg, SC 29115

Honorable Joe Johnson
1345 Huckleberry Lane
Orangeburg, South Carolina 29111
March 16, 2007

Dear Honorable Johnson:

The residents of the Great Branch community in Orangeburg County are working to restore a Rosenwald Teachers’ home that is located ten miles west of Orangeburg on Highway 4. It was built during the 1924-1925 school year with the help of a Rosenwald Fund matching grant. The home was built to house teachers who needed a place to live while teaching in the Great Branch School. The house and the school were built at a time when governmental support for African American education was lacking. Our teachers’ home remains today as an example of the original eight built in the state. The Department of Archives and History found that nearly 500 school buildings (including schools, teachers’ homes and shops) were constructed in South Carolina, but very few still stand today. This resulted in the National Trust for Historic Preservation listing all Rosenwald schools found throughout the Southeast as one of the 2002 11 Most Endangered Historic Places in the United States. Additionally, South Carolina State University and Claflin University were very instrumental and supportive in the life of the school during the 1920s-1950s. Not only did the teachers train on the campuses, but also regular site visits and demonstrations helped the school better serve its students and community.

Currently, the home is the only building still standing of the four that made up the campus of the Great Branch School. We realize the value of this building and are working diligently to raise the funds needed to restore it. Once the restoration is complete, it will house an archival room with artifacts from the home and school that we would like for local students to visit on field trips. There will be a computer center to serve families in our area who do not have Internet access for research, job development, and projects, and a senior citizen area that will focus on health, nutrition and socialization.

The building requires major restoration and we will need help from all of the community to make this a reality. Over the past year, we have raised $3,000 by holding a variety of fundraisers. We also received a $25,000 grant from the South Carolina Department of Parks, Recreation and Tourism. Additionally, we have secured the services of an architect who has drawn current plans and the plans necessary to complete the project, which is divided into phases. Currently, we are engaged in Phase I, which includes the stabilization of the building and work to the exterior. During this time, we submitted a National Register of Historic Places nomination that received the State Review Board’s approval and now awaits final approval by the National Park Service.

We would like to meet with you and show you the project in its infancy so that you will be able to see the need and upon completion see what your partnership with us has supported. Thank you for your attention to this matter. We look forward to hearing from your office regarding a convenient time to meet.

Sincerely,

Rosa Kennerly
Grants Writer
Top 10 Tips for Local Media Relations

By Joanne Fritz
http://nonprofit.about.com/od/nonprofitpromotion/tp/localmedia.htm

Most of the news and information you see on the TV news or in the daily newspaper is generated by people just like you. They send information to the media, usually via news releases and personal contact.

The best media outlets won’t run your news releases verbatim, but they will use the information from them, supplemented with a call to you or a spokesperson.

Here are some tips for getting your organization noticed by your local media.

1. Get to know the media that are most likely to cover you.
Read and watch the media in your local area. Subscribe to the newspapers and magazines; watch the local news; bookmark media websites; and join any organizations where you are likely to meet reporters and editors (some cities have press clubs that you can join).

2. Learn the names of the reporters who cover the beats most significant to you.
For instance, health reporters or sports reporters may be the ones who would be interested in your news. Then you can send your information directly to them rather than just to the “editor.”

Don’t forget more specialized reporters such as the society page editor who might be interested in your special event if it involves community leaders. The calendar page editor will want your event listings. Most newspapers also carry a list of volunteer opportunities, so find out who writes those.

3. Get to know reporters personally.
Start by arranging a short meeting at their papers or TV stations to introduce yourself. Be considerate of their busy schedules and make it brief. Drop off some printed material or personally deliver that press release instead of mailing or emailing it. Over time, you will have other opportunities to develop these contacts into more familiar relationships.

4. Send complimentary copies of your publications to reporters.
Instead of just sending these out with your mass mailings, personally send a copy with your business card attached. You can also attach a note directing the reporter to some item in the publication that might be of particular interest. Send an invitation to your special event to the appropriate reporter. Even if you don’t really expect the reporter to attend, the invitation will remind him or her of you and your organization.

5. Keep up with the personnel changes at your favorite media outlets.
The turnover in the media is often rapid. Develop your own media list and keep it up-to-date. You may be able to subscribe to a media list for your locality, but it can’t substitute entirely for your own meticulously kept list.
6. Always give the media information that is newsworthy.
Your information should be new, noteworthy, and relevant to a large share of the public. Reporters are not interested in yesterday’s news, items that are of interest only internally to your organization, or routine events.

Provide reporters with good human interest stories. Invite staff and volunteers at your organization to let you know about good story ideas that you might be able to pitch to the media. The best ideas often come from people who are on the front lines of your organization.

7. Develop a “virtual” media kit that resides on your organization’s website.
Include the history of your nonprofit, its mission and goals, brief profiles and photos of key staff and board members, the most recent news releases, and a downloadable PDF of the current annual report. Busy reporters will appreciate being able to access this information easily.

8. Take advantage of breaking news stories to promote your organization.
The best way to do this is to develop a cadre of “experts” who can speak to the issues your organization addresses. Train these experts (they can be staff members and/or volunteers) and make them available to reporters.

9. Make yourself available to the media at any time.
Give them a home or cell number where they can reach you day or night. Put that number in your online media kit. Include it on your business card. When you receive a call from a reporter, get back to him or her as soon as you can. Reporters are working on deadline and will appreciate your rapid response.

10. Always thank a reporter for his or her coverage.
Send a hand written thank-you note. Plus, never nitpick over minor inaccuracies. Corrections appear in small type on a back page. They are not worth your effort or of running the risk of irritating a reporter or editor.

Updated 7/5/07
Preservation Briefs are available on the National Park Service website at: www.cr.nps.gov/hps/tps/briefs/presbhom.htm

Preservation Briefs help readers recognize and resolve common preservation repair problems. Published by the National Park Service, the briefs are designed to give owners, managers, and developers of historic properties up-to-date and expert advice. The pamphlets range from ten to twenty pages and include illustrations.

You can order up to five briefs free-of-charge from the State Historic Preservation Office, or you can purchase any number you want from the Superintendent of Documents.

September 2007
Examples of General Questions to Ask Contractors, Architects, and Other Professionals

- How long have you been in business?
- Where is your office address?
- Is your company a member of the Better Business Bureau, the local Chamber of Commerce, or a local union?
- Ask for the name of 3 references that had similar projects completed in the last year and one whose was completed two years ago.
- What types of insurance do you carry? Contractors should have personal liability, workers’ compensation, and property damage coverage.
- Have you done work in my town before?
- Have you ever had disciplinary action filed against you by any state or local agency? Why and how was it resolved?
- How long have you been working as a general contractor/carpenter/architect, etc.?
- How did you learn your skill? What is your level of skill in this area? Do you have any certifications?
- What is the most complicated job you have done using these skills? How did that job turn out?
- How often do you take classes and attend seminars to expand and refresh your skills?
- How often do you communicate with your customers as the job is progressing?
- How quickly could I reach you in an emergency?
- Who fills in for you when you are not available?
- How often would we be able to walk through the job? How much notice would you need?
- How much time will you spend on our job each week, either on site or in planning?
- How many jobs do you currently have going? How many workers are used to manage those jobs?
- How many jobs do you typically handle at once?
- Ask the contractor to explain how a situation with an unsatisfied customer was resolved.
- Will you be using subcontractors on this project? If yes, ask to meet them and make sure they have current insurance coverage and licenses, if required.
- What is the time frame for starting the project?
- What is your approach to a project of this scope?
- What percentage of your business is repeat or referral business?
- Will a permit be necessary for this project?
- Do you supply notarized affidavits or release of liens BEFORE I give you payments of any kind? This must be a "YES!" It is unconditional.
- Have you ever declared bankruptcy or operated a company under a different name?

Please visit the website references below for more question ideas.

Appendix H

Grant Programs for Historic Preservation Projects
State Historic Preservation Office
S.C. Department of Archives & History

Please note: the following descriptions are very brief and do not include all grant restrictions and requirements.

American Battlefield Protection Program (ABPP) Grants: Federal, state, local, and tribal governments, nonprofit organizations and educational institutions are eligible for these grants. The grants are for projects that lead to the protection of battlefield land and sites associated with battlefields. Types of eligible projects range from historical research to archaeological surveys to preservation plans to public education. The grants do not fund land acquisition or capital improvement projects. Grant awards are made once each year. The average grant is around $29,000. The ABPP is a program of the National Park Service. For more information, visit the ABPP website at www.nps.gov/history/hps/abpp/.

Preserve America Grants: Eligible applicants for these federal grants include designated Preserve America communities and neighborhoods, Certified Local Governments (CLGs) in the process of applying for Preserve America designation, State Historic Preservation Offices, and Tribal Historic Preservation Offices. The grants, which are administered by the National Park Service, support preservation efforts through heritage tourism, education, and historic preservation planning. Each grant requires a dollar-for-dollar match. The minimum grant request is $20,000; the maximum grant request is $150,000. More information about Preserve America communities and the Preserve America grants program is available at www.preserveamerica.gov/.

Preservation Fund Grants: Administered by the National Trust for Historic Preservation, these grants are awarded to nonprofit organizations and public agencies for preservation planning and education efforts. The matching grants range from $500 to $5,000 (typically from $1,000 to $2,500). Funds may be used to obtain professional expertise in areas such as architecture, archaeology, engineering, preservation planning, land-use planning, fund raising, organizational development, and law as well as preservation education activities to educate the public. Application deadlines are February 1, June 1, and October 1. For more information, contact the Southern Office of the National Trust for Historic Preservation at 843-722-8552 or soro@nthp.org.

Save America’s Treasures Grants: These grants, which are administered by the National Park Service, are awarded for preservation work on nationally significant historic structures and sites. Grant amounts range from $250,000 to $1 million. All the awards must be matched. Nonprofit organizations, units of state or local government, federally recognized Indian Tribes, and some federal agencies are eligible to apply. The State Historic Preservation Office reviews plans for funded projects. More information about Save America’s Treasures grants is available at www.saveamericanastreasures.org/.

Please note: Properties are listed in the National Register at the local, state, or national level of significance. Most properties are listed at the state or local level. Only a small percentage meets the National Park Service standard for national significance. Check with the State Historic Preservation Office at chandler@scdah.state.sc.us or 803-896-6179 to
determine if your property is listed at the national level before you begin the application process.

**South Carolina Conservation Bank Grants:**
The Conservation Bank was created to protect the state’s significant natural resource lands, wetlands, historical properties, and archaeological sites. The Bank will provide grants or loans for the outright purchase of a property or the acquisition of an easement to protect a property. Eligible recipients of the grants include not-for-profit charitable corporations or trusts whose principal activity is the acquisition and management of interests in land for conservation or historic preservation purposes; municipalities of the state; the SC Department of Natural Resources; the SC Forestry Commission; and the SC Department of Parks, Recreation and Tourism. There must be some provision for public access to the property that is protected. There are two application cycles each year with deadlines on March 31 and July 31. For more information call Marvin N. Davant, Director of the SC Conservation Bank, at 803-734-3986, or visit the Conservation Bank website at [http://sccbank.sc.gov/](http://sccbank.sc.gov/).

**State Historic Preservation Office Grants:**
The State Historic Preservation Office of the S.C. Department of Archives and History administers federal survey and planning grants that can help organizations, institutions, and government entities plan for preserving historic properties. The grants can fund historical/architectural surveys, National Register nominations, preservation planning projects, and preservation education efforts. In addition, projects located within cities, towns, or counties that are Certified Local Governments (CLGs) may also be eligible for “bricks and mortar” grants. (A list of CLGs in South Carolina is available at [www.state.sc.us/scdah/hpclglist.htm](http://www.state.sc.us/scdah/hpclglist.htm).) Eligible “bricks and mortar” projects include stabilizing historic buildings or structures and protecting them from the adverse effects of the weather. All grants require a 50/50 match. More information is available at [www.state.sc.us/scdah/fedbro.htm](http://www.state.sc.us/scdah/fedbro.htm) or contact sauls@scdah.state.sc.us or 803-896-6172.

**Transportation Enhancement Grants:** These grants, administered by the SC Department of Transportation (SCDOT), can fund a range of activities to enhance the transportation experience. Eligible categories include (but are not limited to) acquisition of scenic or historic sites; historic preservation; rehabilitation and operation of historic transportation properties; archaeological research and planning; scenic or historic highway programs; establishment of transportation museums; and landscaping and streetscape improvements. All historic preservation projects must be directly related to the transportation system and involve properties that are listed in or eligible for the National Register. Local governments or state agencies are eligible to receive the grants. A 20% match is required. The State Historic Preservation Office reviews plans for funded projects that affect historic properties. Grants in urban areas are administered by the Metropolitan Planning Organizations. There is an annual statewide competitive grants cycle for projects in the rural areas. More information is available at [www.dot.state.sc.us/community/tep.shtml](http://www.dot.state.sc.us/community/tep.shtml).

**Rural Development Grants:**
The Rural Development Office of the USDA administers the Community Facilities Program that offers grant funds for developing essential community facilities in rural areas. These funds can apply for new and existing construction. Federal grant funds may be used to pay up to 75% of the cost to develop the essential community facility. The remaining 25% becomes the applicant’s responsibility. Other funding participation through leveraging, local fundraising, other CF financial assistance, or applicant contributions can be used as a match. There are population and median household income restrictions. More information is available at [www.rurdev.usda.gov](http://www.rurdev.usda.gov/) or by calling 803-765-5163.

Revised July 2007
South Carolina Archives and History’s Top Ten Tips for Getting Money

1. **Questions**: Ask the granting agency any questions you can think of — their mission is to answer questions and assist you with your application.

2. **Read Directions**: Follow the application directions closely — if you have questions, ask.

3. **Threshold Criteria**: These are items that must be included for your application to even be considered, or cross the “threshold” into competition for a grant. If even ONE is missing, your application will not be considered.

4. **Explain the Project**: Pretend the granting agency knows nothing about your project, even though you have spoken with them. Explain it fully, completely, concisely. Clearly demonstrate what you hope to accomplish.

5. **Consult**: Look to others with experience to review and help with your grant. Talk to the professionals (architects, consultants, contractors) that you are considering using for the project BEFORE you submit the application. Look at successful grant applications and projects. Ask for examples and copy them. Do not reinvent the wheel.

6. **Time**: You cannot start working on your application too soon. Allow lots of time, especially for review of your application. Leave time for the granting agency to review it and ask others to proof and edit your application.

7. **Target the Project**: Specifically identify what the grant funds will be spent on. The end result of the project should be defined and if it is a part of a phased project, explain how the phases will work.

8. **Neatness**: Granting agencies read the applications you produce so neatness is always a consideration. Do not confuse the reviewers and hurt your application with misspelled words and faulty grammar.

9. **Matching Money**: Have secure matching sources — grants will not wait on fundraising to occur. Most grants that fail have no match. Cash match is preferred over in-kind.

10. **Deadlines**: Be aware of deadlines and understand the restrictions that a grant award will place on the project. (Like covenants, procurement, Secretary of Interior’s Standards, bidding, and general rules of operation).

The activities that are the subject of this publication have been financed, in part, with federal funds from the National Park Service, Department of the Interior. However, the contents and opinions do not necessarily reflect the views or policies of the Department of the Interior, nor does the mention of trade names or commercial products constitute endorsement or recommendation by the Department of Interior. Under Title VI of the Civil Rights Act of 1964 and Section 504 of the Rehabilitation Act of 1973, the Department of the Interior prohibits discrimination on the basis of race, color, national origin, or handicap in its federally assisted programs. If you believe you have been discriminated against in any program, activity, or facility as described above, or if you desire further information, please write to: Office of Equal Opportunity, U.S. Department of the Interior, Washington, DC 20240.
